

00:26:04 Ben: You set the targets in the indicator, yes?

00:28:56 Aditya: Are we going long/short on the blue candle as soon as it breaks the box boundary or the next candle? Can you highlight exactly where to go long/short on the next candle.

00:47:26 Aditya: Are we seeing 2 golden reversal lines - a red and a green? Can you walk through a bit slowly the steps that were on the slide mapped to the chart.

01:03:21 Aditya: So, just to confirm - After the signal dot appears we are waiting for the volatility line to cross the golden reversal line

01:04:28 Ninjacators: NEWS: <https://www.forexfactory.com/>

01:07:32 Aditya: Can we walk through of the MES action between 07:10 07:20 where we see the short signal appear? I am getting stuck figure out what cross are we waiting for.

01:15:07 Aditya: So the cross over is between the Golden Cross red line and the volatility line going which changes from blue color to red color. Just mark the cross over point and I will get it.

01:30:53 Leigh: You are trying to find if you have an edge over a block. Are you profitable? 25 trades block per strategy per change is the general rule.

01:50:45 Ben: Y

02:06:37 Ben: This is very interesting, can't wait to "play" with this

02:12:10 Aditya: This is great.. Looking into the kitchen

02:26:59 Ninjacators: UESASupport@ninjacators.com

02:40:36 Ben: The pullbacks frequently follow the signal. I'm with Greg on this.

02:44:32 Aditya: I think once we try it out we will have questions.

02:44:59 Ben: Yes, you have, a ton!

02:48:15 Ninjacators: <https://drive.google.com/file/d/1lXHm7qmlg3bILVd5HEYLjCKvl-9aS2cS/view?usp=sharing>

02:52:21 Ben: It worked to click on the URL then download

02:53:18 Ninjacators:

02:54:46 Ninjacators: UESASupport@ninjacators.com

02:54:46 Aditya: Thank you!! This was a great start. Yes, sending something in advance will help a lot - we can read up on it in prep for the session.

02:55:13 Ben: The PDF worked too.

02:56:43 Ben: Thanks
